

Client Background

The client is a Medical College Hospital with extensive healthcare facilities including a 650 beds – Multi specialty hospital. With 40+ medical specialties, the client provides comprehensive medical services to the public and is aiming to establish itself as a centre of excellence.

Challenges faced by Client

The client operates multiple businesses including Medical College, Nursing College and Multi-specialty hospital. The client has already implemented SAP B1 for Material management and Finance across its businesses. The client wanted to have a seamless Material management and Financial operations which is tightly integrated with the operations of the Hospital. Achieving better control and Optimization of purchasing operations was a priority.

Key Accomplishments

- Thorough study of existing operational process was conducted and integration touch points were identified
- The Data mapping between the legacy system and IDEAMED HIS was done
- Integration scripts were developed for real time integration between IDEAMED HIS & SAP B1
- Demarcation of privileges between IDEAMED HIS and SAP B1 was configured
- Training sessions for all the stakeholders

Benefits Achieved

- Vast historical procurement data is made available for optimization
- Aging of Outstanding revenue was brought down
- Optimization of shelf life of Stock was achieved
- Seamless integration from Department Indent – Purchase Request – Purchase Order – GRN – Invoice was achieved
- Laborious training effort was saved

Summary

IDEAMED was integrated in real time with SAP B1 for End to End Accounting and Inventory Management operations. The client was able to utilize the Analytical Strength of Financials in SAP B1 and also providing a tailor made solution to the End user through IDEAMED HIS.
