

**Improve patient experience and increase revenue with IDEAMED HMS**

IDEAMED HMS is a web based end to end, Hospital Management System, capable of meeting the IT needs of hospital of any size.

Our USP is "Customization without Coding". Built on our own Application Factory, IDEAMED HMS can be customized to meet your exact needs.

IDEAMED has a comprehensive list of modules that address every aspect of hospital management.

*“ Only 20% of the patient satisfaction is linked to medical outcomes.*

*Over 10 factors are related to hospital administration and can be easily managed.*

*40% of all malpractice claims were totally groundless made purely by aggrieved patients and their families and could have been avoided easily, by a proactive Patient Experience Management program ”*

- Gartner
